

MARS TRISOMY HUMAN

(Prehistoric Life Origin)

M.Arulmani, B.E.
(Engineer)

V.R.Hema Latha, M.A., M.Sc., M.Phil.
(Biologist)

Author Submission and Abstract

Trisomy human shall be considered as the **prehistoric human** lived in **MARS planet** before started living on the Earth. The prehistoric human when lived in MARS have different **genetic characteristic**. Subsequently due to continuous expanding universe and different climatic condition the Trisomy population lived in MARS probably have become completely

extinct and new generation started living on the **Earth planet** by **natural selection** under different environment condition on the Earth planet. It is focused that human ancestor have more genetic value than APES.

In biological, medical science the term **Trisomy** coined by the scientist which means a genetic deviation characterized by the presence of additional chromosome (in odd number) where there are usually pair (two chromosome). In **MODERN HUMAN** there are 46 chromosome (23 pairs) in human cell. The rare occurrence of additional chromosome within pair of chromosome leads to some times 47 chromosome or some time 45 chromosome in human cell. The occurrence of additional chromosome within the pair of chromosome is usually called in medical term as **Syndrome**.

In human each pair of chromosome derives from each parent i.e. male and female. The occurrence of Trisomy chromosome called in medical science as **third copy** which sometimes leads to **social complications**. Where the third copy comes from?.

What does means Trisomy chromosome?... Why it occurs in living organism?... Case study shows that Trisomy chromosome occurs not only in human cells but it also occurs in **apes** and **mice**. It is speculated that there shall be pre ancestral genetic reason for occurrence of TRISOMY in human as well as APES, MICE.

It is hypothesized that the prehistoric population lived in MARS had only three chromosome i.e. two numbers **autosome** and one number **sex chromosome**. It is speculated that the prehistoric MARS population had only single sex chromosome. During the course of evolution the modern human probably acquired additional sex chromosome which made into **pair**. It is focused by the author that the Trisomy human was very wise and expert in

advanced scientific knowledge concerned with astronomy, biological science. The Trisomy human population might have been called as **AKKILEN**, **AKKILA**. **AKKILAN** shall mean super star of MARS. **AKKILA** shall mean mother of MARS. It is focused by the author that the **Biblical ADAM and EVE** might have lived in MARS Planet in prehistoric time with different genetic structure.

Key Words

Prehistoric human lived in MARS, Spontaneous evolution of life origin, Impact of electromagnetic radiation, responsible for spontaneous generation of life, Trisomy in medical science is nothing but the genetic reflection of prehistoric three chromosome human, lineage of organism linked with natural frequency of Earth, SCHUMANN RESONANCE, existence of human species, TRISOMY human origin with **AB** type blood.

Special Thanks

Most of the data collected and presented in this article are base on case study from **internet website** through **Google search**. Author considers Google search mechanism as **GOD** or **SUPER NATURE** acting as a **mediator** to derive wisdom and intelligence from the **global web link**. Further heart felt thanks also extended to **WIKIPEDIA**, **NASA'S** administration for providing valuable information about prehistoric dark continent **EZHEM** (INDO) (so called MARS RED PLANET) and dedicated assistance extended by my office team. The prehistoric Dark Continent MARS planet might have become red planet during the course of expanding

universe, thanks to nature also in cherishing the human population with enhanced colour to the human skin.

1. INTRODUCTION

In modern scientific world the **origin of life** is still under **mystery**. The universe is believed to have formed before 13.7 billion years based on **Big bang theory** and the whole universe, matter, life were believed to have been evolved from **star dust particles**.

There are thousands of theories about the Cosmo universe. But still the scientists are not able to define what is the shape of Universe. Further lot of controversy exists among scientist what is **dark matter** and what is **dark energy**. The prehistoric Trisomy human when lived in MARS have already used advanced scientific language in DOT form called as **MARS CODE** and formulated the first origin of life had only **three chromosome**. Further they observed the lineage of chromosome organism is closely associated with increase in natural frequency of oscillation of Earth i.e. the increase in chromosome level of organism is proportional to the increase in natural frequency of oscillation of Earth. In fact the **amoeba** having 12 chromosome shall be considered as much junior to the Trisomy human who had 3 chromosome.

The increase in natural frequency of oscillation of Earth shall be very well understood from the theory of **SCHUMANN RESONANCE** which established that the frequency of oscillation of Earth gradually increases from the prehistoric time and it is expected to reach zero point by 2013.

The Trisomy population already established the first life was originated **spontaneously** from space matter due to impact of electromagnetic radiation

and the Trisomy human derived three chromosome on origin from three fundamental neutrinos **photon, electron, proton** one number from each neutrinos. It is hypothesized that origin of life may not be possible with artificial lightning stipulated in **Primordial Soup Theory** but it is possible with electromagnet radiation. Electromagnetic radiation shall be considered as having different Physical, Chemical, Mathematical properties compared to lightning.

The philosophy of three fundamental neutrinos, shape of Cosmo universe were narrated and the article was published in IJSER issue 5, 2013 under the title of “Super Scientist of Climate Control” and in IJSRP issue 4, 2013 under the title of “Cosmo Super Star”. This article MARS Trisomy human shall be considered as a extended version of previous published article by the same author to bring about more case studies for further intensive research in the **origin of life**.

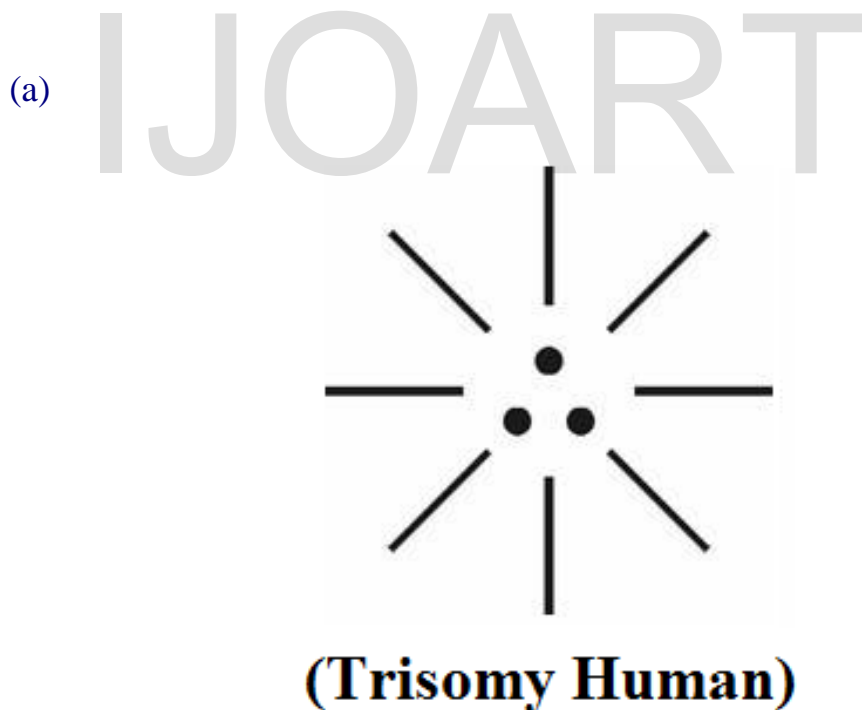

2. MAIN HYPOTHESIS

1. Trisomy human shall mean prehistoric human had only **three chromosome**.
2. Trisomy human has been evolved **spontaneously** by prehistoric electromagnetic radiation (**EMR**).
3. Trisomy human lived in MARS planet having different genetic structure and subsisted with **Ozone** breathe.
4. The prehistoric Trisomy human shall also be called as **Star Human** evolved from **dark energy**. The smallest unit of dark energy shall be

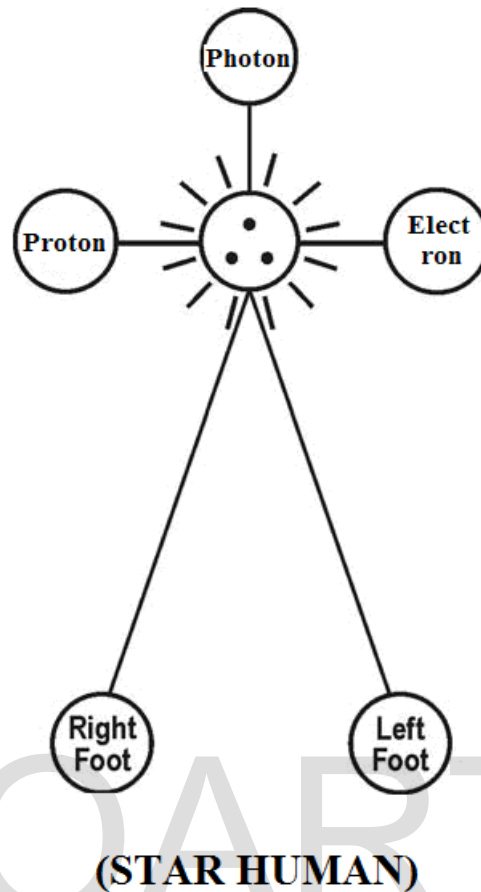

considered as **CELL** consists of Photon, Electron, Proton particles (neutrinos).

5. The **TRISOMY** shall not be considered as **Syndrome** but shall be considered as **wisdom**.

It is focused that the prehistoric human has advance knowledge about electromagnetic radiation. From Millers experiment it is understood that the origin of spontaneous life is not possible due to impact of **LIGHTNING**. It is hypothesized by the author that origin of spontaneous life may not be possible with lightning but it can be possible with electromagnetic radiation. The properties of electromagnetic radiation is different from properties of lightning.

(b)

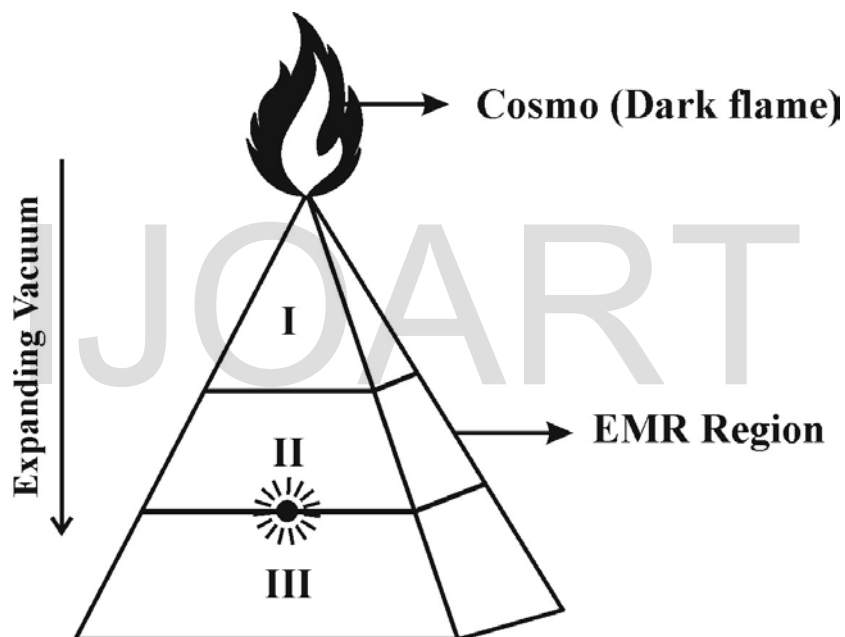

The right and left dot shall be considered as **Autosome** (Two Chromosome), the center dot shall be considered as **sex chromosome** (Single Chromosome). Further in medical term the three dot shall be considered as follows:

- a. Right Dot – DNA (Responsible for functional part)
- b. Left Dot – Hormone (Responsible for Structural part)
- c. Center Dot – RNA (Responsible for Sequence part)

3. HYPOTHETICAL MODEL OF COSMO UNIVERSE

It is hypothesized by the author that the entire cosmic universe composed of three regions of vacuum and the material universe associated with Electromagnetic theory shall be considered as located in the 3rd region of vacuum. (Observable region). The three region of Cosmo universe shall be considered as having three distinguished physical, chemical, mathematical properties.

Region I – Perfect vacuum region (Anti-Neutrinos radiation)

Region II – Partial vacuum region (Neutrinos radiation)

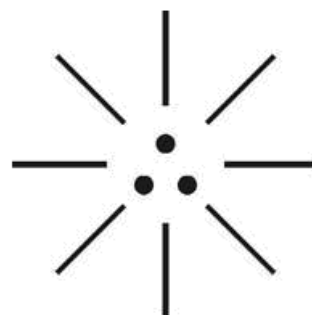

Region III – Observable Vacuum region (EMR radiation)

It is hypothesized by the author that the region 1 shall be considered as the region of three fundamental anti-Neutrinos radiation region 2 shall be considered as the region of three fundamental Neutrinos radiation and region 3 shall be considered as the EMR region. In modern physics these regions

shall be considered equivalent to **three regions of vacuum**. Further it is speculated that Anti-Neutrinos, Neutrinos are so powerful and shall not be affected or intervened by EMR. In other words it shall be focused that EMR shall not enter the region of Neutrinos and the region of anti-neutrinos. But both Anti-Neutrinos, Neutrinos shall enter into and intervene with the 3rd region of EMR region which results Expanding universe. It is speculated that the Neutrinos and Anti-Neutrinos probably may travel at a speed faster than light in the region I and II and travel at the speed equivalent to the speed of light in the region III as formulated by **Einstein**. The case study related to the vacuum hypothesis are narrated as below. The Einstein region (third region) shall also be considered as material universe where all planets, asteroids, comets exists in different level under strong gravitational force exerted by region-I. In the Cosmo universe Sun, Earth, Moon shall be considered as base of Universe in triangular configuration.

IJOART

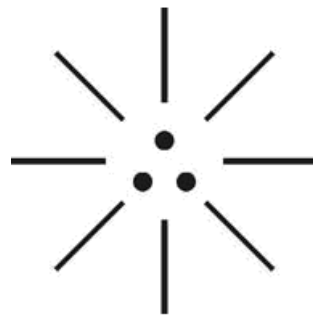

4. WHAT ARE NEUTRINOS?

(NEUTRINOS)

The three tiny dots shall be considered as prehistoric scientific language (Called as MARS CODE) indicating the relative position of three fundamental neutrinos. The three tiny dots shall be considered as the most fundamental dark energy particles responsible for evolution of

Electromagnetic radiation and formation of various matters and life. The prehistoric populations considered **photon, electron, proton** as three fundamental Neutrinos of universe exists as **charged particles** having angular displacement of 120^0 between any two particles and formulated with **three tiny dot**. The **right dot** shall be considered as proton responsible for functional part of universe, **Left dot** shall be considered as Electron responsible for structural part of Universe, the **centre dot** shall be considered as photon responsible for law part of universe. All other subsequently evolved neutrinos including supernova, quark, Mun etc shall be considered as the **subspecies neutrinos** to the fundamental three Neutrinos. The three fundamental Neutrinos shall also be closely called in modern physics as existence of **ATHER ENERGY OR BLACK BOX ENERGY** stipulated by **TESLA**. The region II of Universe shall be considered as the **Neutrinos region** or **Ather energy region (TESLA Region)**.

(Aether Energy)

5. WHAT IS CNO CYCLE?

In prehistoric time CNO might be considered as the three fundamental chemical element **Carbon, Nitrogen, Ozone** which are responsible for entire

chemical evolution of universe. It is focused that for all the chemical property of matter whether **Organic** (or) **Inorganic** the CNO shall be considered as the **Centro mere** of whole chemical universe. Further all the matter, Materials shall be considered as the **logarithmic measure** of CNO in different combinations. In the Cosmo universe the region-I shall be considered as **hydrogen radiation** and region-II shall be considered as **Neutrino Radiation** consists of three fundamental IONS **carbon, nitrogen, ozone**. Further carbon, nitrogen, ozone shall be considered as three species IONS to the hydrogen radiation and thousands of chemical elements shall be considered as **sub species elements** to the three fundamental chemical IONS carbon, nitrogen, ozone.

6. WHAT IS AMINO ACID? NUCLEIC BASE?

It is focused by the author that the Amino acid, Nucleic base shall be considered as the prehistoric organic matter evolved from fundamental **CNO** matter which is responsible for spontaneous evolution of first human from Electromagnetic radiation. The first human evolved had 3 chromosome with different genetic characteristics when lived in **MARS**. Further it is focused that the prehistoric human population derived three chromosome from three fundamental **CNO** matter. It is focused that existence of Human without **CNO** fundamental is impossible.

It is focused that the modern human with 46 chromosome might be evolved at much later period in the **evolution lineage** and switched over to **oxygen breath** from ozone breath when lived in **EARTH planet**. Further the Modern human shall be considered as the logarithmic measure of **CNO** in different environment of Electromagnetic radiation in much later period.

Further it is focused that the **CNO** matter shall be considered as the fundamental three parameters of Biological Human.

- (i) Carbon - **RNA**
- (ii) Nitrogen - **Hormone**
- (iii) Ozone - **DNA**

7. CONCLUSION

Biogenesis is the branch of Science which believes that Life was originated only from **LIFE**. Abiogenesis is the branch of science believes that Life was originated from **Non-Life**. So far there is no concluding fact that how the Life was originated? Prehistoric TRISOMY HUMAN lived in MAR Planet have already formulated that the **three chromosome** organism was the first life originated which is ancestor and **seed link** to Modern human. It is hypothesized by the author that Prehistoric human and Modern human are having different chromosome and different structural and functional characteristics. Further in human anthropological science the so called **Dravidian, Aryan** races shall be considered as different **human species** to prehistoric TRISOMY HUMAN in the lineage of evolution.

*The Prehistoric human had **3 chromosome** (TRISOMY Super Human)*

*The Modern human have **46 chromosome** (Modern Human)*

-Author

8. HYPOTHETICAL NARRATION AND CASE STUDY

1. Distinction between the word Search and Research

The word search refers to an attempt to find. The word research refers to careful study of various scientific matters. Is there any difference between search and research? It is focused that search may be referred to something which is already exposed. The research may be referred to something which is still under mystery which is searched for.

2. Distinction between Creation and Evolution

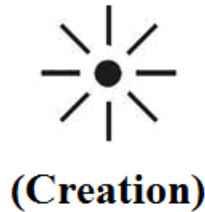

There are so many theories about the philosophy of creation and evolution. It is focused by the author that creation is something which is referred as **ORIGIN**. Evolution is something which shall be considered as **JOURNEY**. Further creation shall be considered as single tiny dot and evolution shall be considered as three tiny dots. In natural science single dot shall be considered as **super nature** and three tiny dots shall be considered as mere **nature**. In hypothetical model of Cosmo Universe the dark flame shall be considered as the creative product and the material evolution due to impact of human act in the region-III shall be considered as the evolution product due to disturbance in natural equilibrium.

3. Distinction between Cosmo and Universe

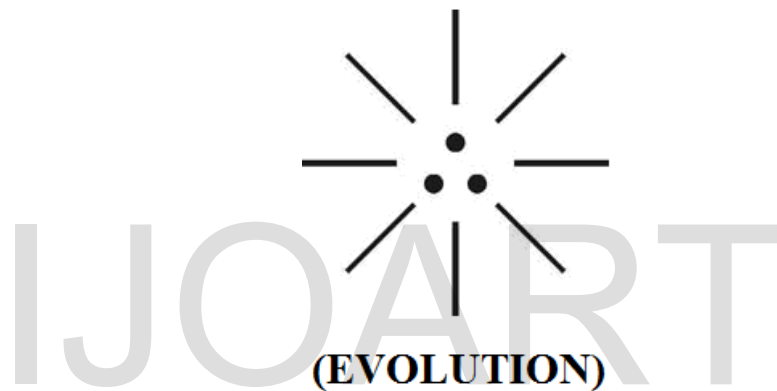

In astrophysics, astronomical science there is no clear definition between Cosmo and Universe. In many occasions these words are used in common manner to indicate about space matter, dark matter, dark energy. It is focused that the Cosmo Universe shall be considered as integral part of

Cosmo and Universe. The Cosmo (Dark Flame) shall be referred as **creation** and super nature and the Universe shall be referred as **evolution** and nature.

(a)

(b)

4. Distinction between Dark Matter, Dark Energy, Dark Law

In classical physics, quantum physics the word dark energy and dark matter are not clearly defined and still under mystery, what is dark matter?... what is dark energy?... It is focused by the author that dark matter shall be considered as functional part of Universe and dark energy shall be considered as structural part of Universe. Dark law shall be considered as the sequential act on dark matter and dark energy. Dark flame shall be considered as the integral part of dark matter, dark energy, dark law. The smallest unit of dark energy shall be considered as **CELL** consists of photon, electron, proton. The

smallest unit of dark matter shall be considered as **ATOM** consists of proton, neutron, electron.

5. Distinction between EMR and Lightning

In astrophysics there is no clear definition between **EMR** and **Lightning**. It is focused by the author that EMR shall be considered as integral part of fundamental three neutrinos photon, electron, photon responsible for evolution of all kind of matters. It is also called as **regenerative force** to form matters. On the other hand lightning shall be considered as disintegration of EMR which diversified as neutrinos photon, electron, proton. The lightning shall also be considered as **degenerative force** which disintegrate the existing matters to become **neutrinos**.

6. Distinction between Neutrinos and Atom

Neutrinos shall be considered as charged particles existing in the region-II of Cosmo universe whereas atom shall be considered as comprising of proton, neutron, electron existing in the region-III of universe. Further neutrino particles shall be considered as traveling faster than atom i.e. faster than the speed of light.

7. What does means Electromagnetic evolution?

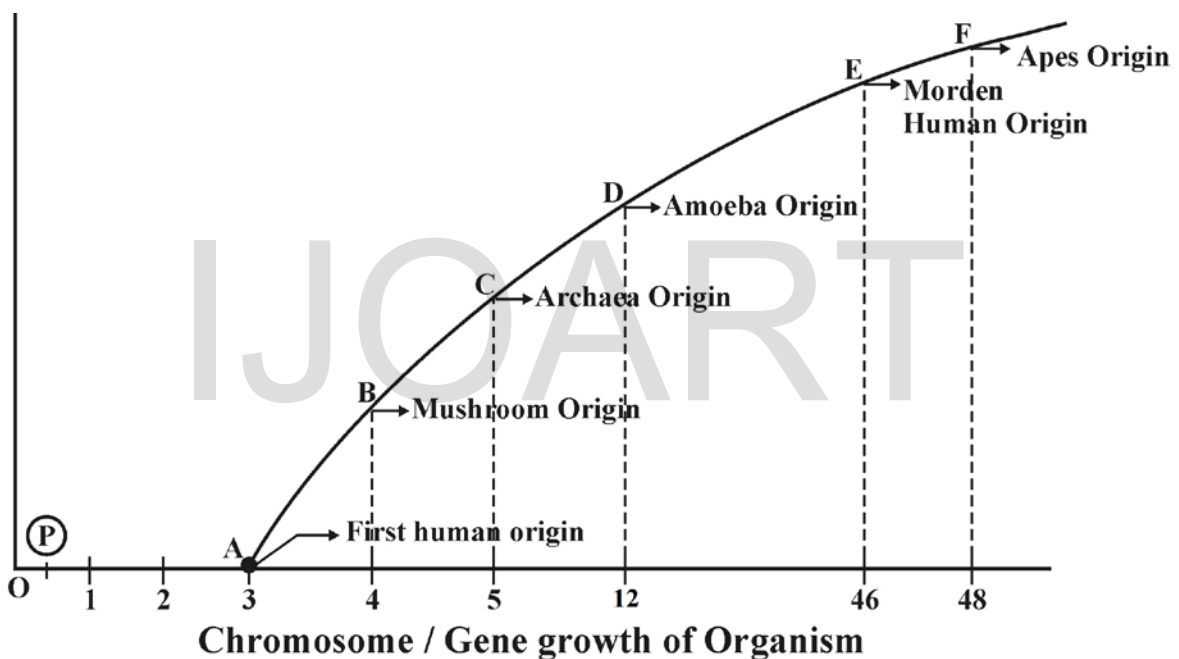

The electro magnetic evolution shall be considered as the state of origin of life matters and non life matters due to impact of electromagnetic radiation. EMR shall be considered as the parent of all matters exists in three states i.e. gas, liquid, solid. In physics the term **plasma** shall be referred to middle state between matter and EMR. It is focused that plasma shall be considered as evolved from electromagnetic radiation. It is hypothesized that the prehistoric trisomy human with three chromosome shall be considered as first life originated **spontaneously** from three fundamental neutrinos due to

impact of EMR. The three chromosome shall be considered as evolved each one from photon, electron and proton.

Evolution of various organisms with different chromosome levels and its species shall be considered as equivalent to millions of rays emanated from electromagnetic spectrum with different magnitude and frequency level.

8. Hypothetical order of evolution:

It is focused that the hypothetical position and order of evolution of Prokaryotes, Archaea, Amoeba shall be indicated as below

O → Origin (Cosmo Dark Flame)

P → 100 million years ago (Prokaryotes)

A → 100 million years ago (First human)

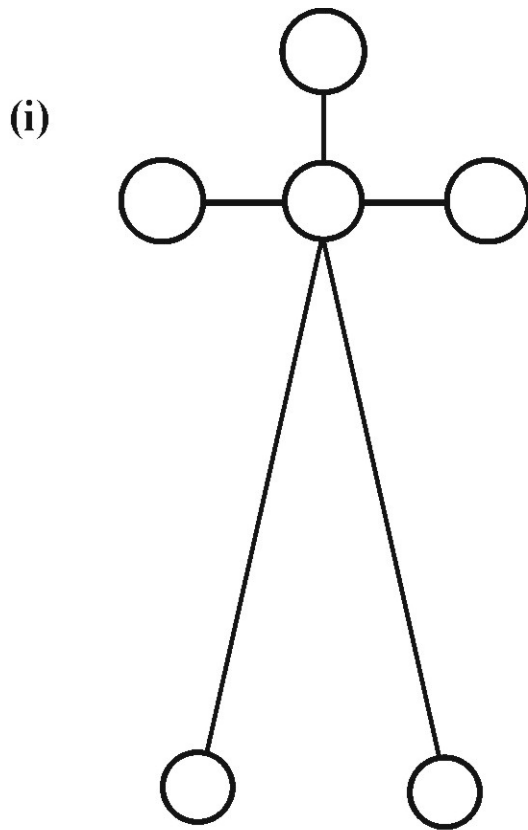

B → 90 million years ago (Mushroom)

C → 80 million years ago (Archaea)

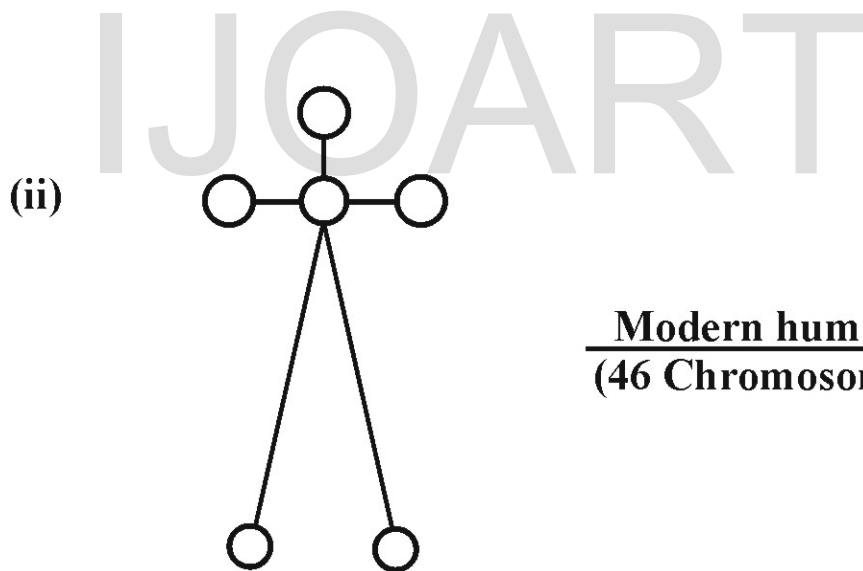

D → 70 million years ago (Amoeba).

9. Evolution of Dinosaur era to microbe era:

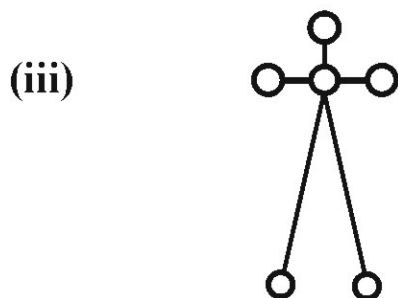

It is hypothesized by the author that the **evolution is a continuous process**. It is speculated that the **size** of organism is closely associated with the level of chromosome, i.e. lesser the chromosome level, higher the size of organism. It is hypothesized by the author that in the evolution of early universe the size of organisms might be gradually reduced due to **increase in chromosome level**. It is speculated that in future more and more microbes may be evolved having **higher chromosome level**. It is hypothesised by the author that the prehistoric human, animals, plants etc. might be **giant** in size. It is speculated that in Pre-historic time there couldn't be in existence of any **Microbes**. Microbes shall be considered as organisms evolved during modern period say about **50,000** years ago. It is hypothesised that the Prehistoric human could have been evolved of **Dark Flame** around **10,00,000** years ago and modern human could have been evolved of **EMR** around **5,00,000** years ago. Present day human may be a species to modern human.

Prehistoric human
(3 Chromosome)

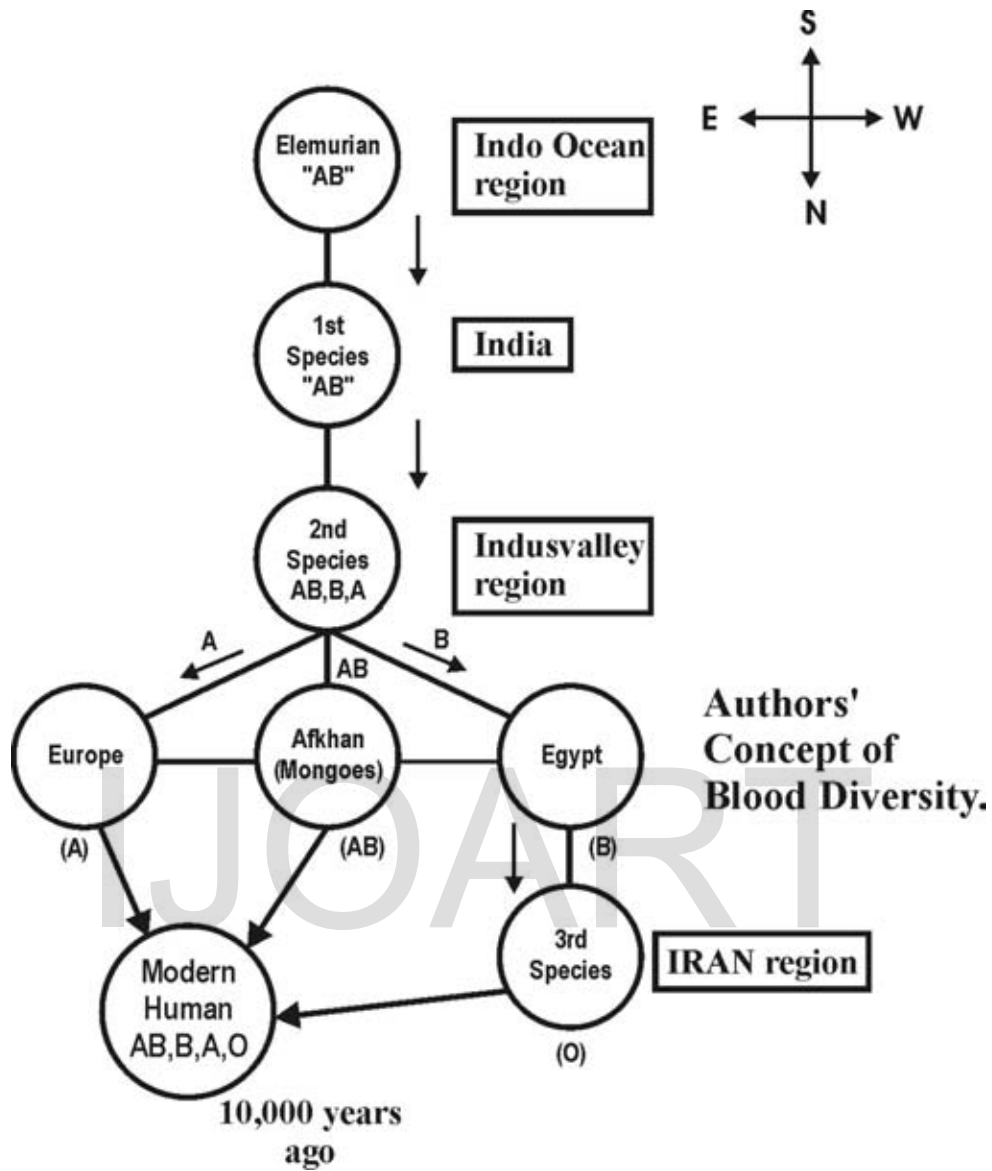

Modern human
(46 Chromosome)

Modern human
Species

10. Hypothetical blood diversity

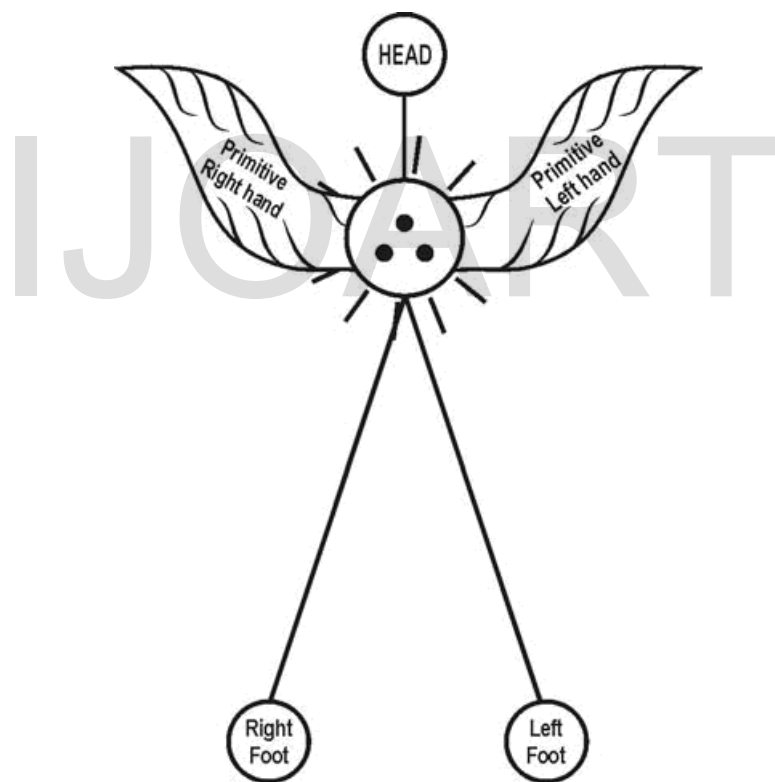

It is hypothesized by the author that from prehistoric time to modern time there may be three states of blood group might have been evolved due to impact of electromagnetic radiation. ‘O’ type blood (universal donor) might be evolved during modern period.

- i. Stage i – AB type only (MARS TRISOMY HUMAN)
- ii. Stage ii – AB, A, B (DRAVIDIAN ORIGIN)
- iii. Stage iii – AB, A, B, O (ARYAN ORIGIN)

It is focused that in the lineage of evolution all four type of blood might not have been evolved at one stretch and might be evolved in phased manner. It is speculated that Aryan population shall be considered as evolved much later period and species to Dravidian population. **ABORIGINAL** shall mean **AB+ORIGINAL** i.e. AB type shall be considered as evolved on origin. It is focused that the blood type of prehistoric Trisomy human shall be considered as AB type (universal acceptor).

11. How prehistoric trisomy human looks like?

(MARS TRISOMY HUMAN)

Genetic Value in Human Hand

It is focused that Modern human having two hands with proper fingers. It is hypothesized that the prehistoric populations while living in

MARS might be having **wing like hands** in the **Primitive level** due to different chromosome level. Further the 48 Chromosome Apes are slightly deviated hands structure compared to **Modern human**. It is focused that 3 chromosome human, 46 chromosome humans are much senior to Apes who are having 48 chromosomes.

12. *Adam is trisomy human?*

It is speculated that Adam shall be considered as trisomy human lived in MARS planet in prehistoric time and having different genetic structure and capable of **flying**. Further while live in MARS planet the Adam population might have subsisted with **ozone** breathe. Due to different climate condition the prehistoric trisomy population could have been **extinct** at one stage and new generation might have started living on **Earth planet** with different genetic structure and subsists with **oxygen** breathe. It is speculated that the so called Dravidian population stipulated in human anthropology might have been originated when **Sun** started giving red radiation when oxygen might have been evolved from ozone at much later period.

13. *What is the name of single chromosome organism?*

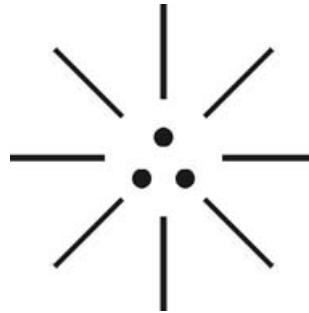

It is hypothesized that **Karithiri** (Cosmo) shall be considered as **super natural** organism having single chromosome. **Karithiri** shall mean dark flame.

(Dark Flame)

9. TRIBUTE TO MARS MOTHER

(Trisomy Human Ancestor)

*My mother... my god... my lord...
You are three-in-one nature
You are three-in-one universe
You are the Cosmo star
You are the Super scientist
You are the three-in-one logic*

*Right dot is your mind
Left dot is your flesh
Center dot is your heart*

*You gave Art through right dot
You gave Science through left dot
You gave wisdom through center dot*

*You are like tripod structure
Sun, Earth, Moon are your base
Neutrinos are your pillars*

*Right dot is your EMR
Left dot is your Gravity
Center dot is your strong force*

*You are the dark radiation
You are the tower of MARS
You are the three-in-one spectrum*

*Right dot is your IR rays
Left dot is your visible rays
Center dot is your UV rays*

*Proton is your right hand
Electro is your left hand
Photon is your radiation blood*

*Planets are your obeying children
Asteroids are your special children
You are the three-in-one quantum law*

*Right dot is your magnetic flux
Left dot is your electric flux
Center dot is your optic flux*

*Inductance is your right hand
Capacitance is your left hand
Resistance is your black box heart*

*Right dot is your fundamental ozone
Left dot is your fundamental nitrogen
Center dot is your fundamental carbon*

*Right dot is your love
Left dot is your mercy
Center dot is your redemption*

*You are the Cosmo universe
You are the dark flame
You are the Triphthong mother*

*Right dot is your dark matter
Left dot is your dark energy
Center dot is your dark law*

*DNA is your right hand
Hormone is your left hand
RNA is your black box heart*

*You are the super science
Right dot is physics
Left dot is Chemistry
Centre dot is mathematics*

*Einstein is your right hand
Newton is your left hand
Tesla is your black box heart*

*You are the AKKIE
You are the black radiation
You are the Triphthong mother*

*Red is your right hand
Green is your left hand
Blue is your black box heart*

*You are the mother of language
You are the mother of MARS
You are the ruler of Cosmo*

*Right dot is your vowel
Left dot is your consonant
Center dot is your grammar law*

*You are not the missing link!
You are the super link!!
You are the seed to the Earth!!!*

*You are the history of mankind
Alpha is your right hand
Omega is your left hand*

*You are the knowledge of universe
Right dot is your commonsense
Left dot is your intelligence
Center dot is your wisdom*

- author
